

INFORMACIJE O PROJEKTU	
Naziv projekta	Construction projects of modern farm
Sektor	Of agriculture,
Lokacija	Živinice,Gornja Višća-Beširovići
Status projekta	Active
Opis projekta	<p>The project will be based on the construction for milking animals Complex throat (throat milking about 100), for raising the playback offspring (female calves-calf heifers about 40) and male calves for fattening further approximately 40 calves. In addition would be based on improving the quality of milking as well as their own hygiene to farms and the system milking (modernized parlors). When it comes to agricultural production plan to process approximately 300ha of land (planting all kinds of crops that used to feed the livestock on the farm) located in the vicinity of wages on which it plans to build the complex. For agricultural production to us was necessary and good equipment because it is a large area of land (trneutno has a small machinery). And in the foreseeable future, our aim is the completion and release of a mini dairy plant.</p>
Procjena ukupnih troškova	
	750.000 km
